

Introduction – The purpose of this note is to provide installation instructions and comments on a patch for the CQ/X Client software. The patch applies to version 1.7.4 of the software and is provided to implement the capability of producing KML files for use with Google Maps.

Previous Patches – This is the first patch for version 1.7.4. Users of previous versions should download a full copy of version 1.7.4 from www.no5w.com to bring their software up-to-date prior to applying this patch.

Installation – In addition to these notes the zip file associated with this patch contains the following files which should be installed manually in the directories indicated in the table. **WARNING: If you have installed the program in a location other than C:\Program Files\CWSoft\ you will need to adjust the locations accordingly.** After unzipping the files copy them to the directories indicated below.

File	Installation
TQP.DLL	This file replaces the file by the same name in the contest definitions directory of the application. For the standard install this will be in directory C:\Program Files\CWSoft\CqxClient\ContestDefns
CQXClient.pdf	This file replaces the file by the same name in the Documents directory of the application. For the standard install this will be in C:\Program Files\CWSoft\CqxClient\Documents\
CQXClient.hlp CQXClient.cnt	These files replace files of the same names in the following directory assuming a standard install C:\Program Files\CWSoft\CqxClient\

Problems Addressed/Enhancements – The following enhancement is provided by these new files.

Problem/Enhancement	Description
Ability to export a KML file	<ul style="list-style-type: none">• The new TQP.DLL file adds the capability of exporting the county line crossing data to a KML file for use in Google Maps...• The other files bring the help files (PDF and HLP) and the help contents file up to date to reflect this new feature and explain the process for making the KML file available to Google Maps..
