

Introduction – The purpose of this note is to provide installation instructions and comments on a patch for the CQ/X Client software. The patch applies to version 1.7.4 of the software and is provided to fix the problems described below.

Previous Patches – This is the second patch for version 1.7.4. Users of previous versions should download a full copy of version 1.7.4 from www.no5w.com to bring their software up-to-date prior to applying this patch. Patch 174-01 should be applied prior to applying Patch 174-02.

Installation – In addition to these notes the zip file associated with this patch contains the following files which should be installed manually in the directories indicated in the table. **WARNING: If you have installed the program in a location other than C:\Program Files\CWSoft\ you will need to adjust the locations accordingly.** After unzipping the files copy them to the directories indicated below.

File	Installation
CQXClient.exe	This file is the main executable and replaces the file by the same name in the main directory of the application. For the standard install this will be in directory C:\Program Files\CWSoft\CqxClient\
CQXClient.pdf	This file replaces the file by the same name in the Documents directory of the application. For the standard install this will be in C:\Program Files\CWSoft\CqxClient\Documents\
CQXClient.hlp CQXClient.cnt	These files replace files of the same names in the following directory assuming a standard install C:\Program Files\CWSoft\CqxClient\
WVE_SP_CQP.MLT	This file replaces the file by the same name in the Contest Definitions directory of the application. For the standard install this will be in C:\Program Files\CWSoft\CQXClient\ContestDefns\

Problems Addressed/Enhancements – The following problems are addressed by the new files

Problem/Enhancement	Description
Program crash on activating the multi-county logging dialog	<ul style="list-style-type: none">• The new CQXClient.exe fixes a problem wherein activation of the logging dialog associated with multi-county operation would cause a program crash. .• The (PDF, HLP, and CNT) files update the help system with improved instruction on the use of the multi-county operating capability.
DC was incorrectly showing as a multiplier in the CA QSO party	<ul style="list-style-type: none">• The new version of the WVE_SP_CQP.MLT file removes DC as a multiplier and makes it an alias for MD.
