

Introduction – The purpose of this note is to provide installation instructions and comments on a patch for the CQ/X Client software. The patch applies to version 1.7.4 of the software and is provided to fix the problems described below.

Previous Patches – This is the twelfth patch for version 1.7.4. Users of previous versions should download a full copy of version 1.7.4 from www.no5w.com to bring their software up-to-date prior to applying this patch. You should apply patches 174-01, 174-02, ..., and 174-11 prior to applying Patch 174-12.

Installation – In addition to these notes the zip file associated with this patch contains a setup file for automatically installing the patch in C:\ProgramFiles\CWSoft\CQXClient\. **WARNING: Please note that the setup file assumes that you have installed the program in C:\Program Files\CWSoft\.** If this is not the case you can still run the setup but following this you will need to manually copy each of the files to their corresponding directories in your location. Here's a list of the files contained in this patch and a description of where they will be installed.

File	Installation
CQXClient.exe	This file is the main CQ/X executable. This file replaces the file of the same name in the root directory of CQ/X which in the standard installation will be C:\Program Files\CWSoft\CqxClient\

Problems Addressed/Enhancements – The following problems/enhancements are implemented by the new file

Problem/Enhancement	Description
Problem with Assignable NumPad Keys	The ability to assign tasks to NumPad keys was causing erratic operation of QSO Entry. This feature is deactivated in this patch and improvements made in the AutoCQ and Send Call While Entering features. As time permits the ability to assign tasks to NumPad keys will be fixed and reintroduced.
