

Introduction – The purpose of this note is to provide installation instructions and comments on a patch for the CQ/X Client software. The patch applies to version 1.7.6 of the software and is provided to implement the enhancements and fix the problems described below.

Previous Patches – This is the eight patch for version 1.7.6. Users of version 1.7.5 that have installed all of the patches for that version and 176-01, 176-02, 176-03, 176-04, 176-05, 176-06 and 176-07 can apply this patch without downloading version 1.7.6. Other users should first download and install a full copy of version 1.7.6 from www.no5w.com then apply patches 176-01, 176-02, 176-03, 176-04, 176-05, 176-06, 176-07, and 176-08 in that order. Note that although there was a problem with 176-04 you should still install it to implement the non-problematic changes. The problem was fixed in patch 176-05.

Installation – In addition to these notes the zip file associated with this patch contains a setup file for automatically installing the patch in C:\ProgramFiles\CWSoft\CQXClient\. **WARNING: Please note that the setup file assumes that you have installed the program in C:\Program Files\CWSoft\.** If this is not the case you can still run the setup but following this you will need to manually copy each of the files to their corresponding directories in your location. Here's a list of the files contained in this patch and a description of where they will be installed.

File	Installation
CQXClient.exe CabrilloTags.txt	This is the main executable and a file containing the Cabrillo tag definition. They replace the files of the same name in the main directory which in the standard installation is C:\Program Files\CWSoft\CQXClient\
K3Menus.txt K3MenuHlp.txt	These are files containing menu items and associated documentation and replace files of the same name in the Radios directory which in the standard installation is C:\Program Files\CWSoft\CQXClient\Devices\Radios\
SioWinKey.DLL	This is the DLL that implements the interface to the WinKey. It replaces the file of the same name in the Keyers subdirectory which in the standard installation is C:\Program Files\CWSoft\CQXClient\Devices\Keyers\

Problems Addressed/Enhancements – The following problems/enhancements are addressed.

Problem/Enhancement	Description
K3 Menu items and associated documentation are out of date	K3 menu items updated to include SIG RMV, AFSK TX, ACG DCY, and PB CTRL
Cannot change the baud rate used in communication with the radios	Problem fixed.
WinKey throws an error complaining of missing restart file	Problem fixed
