

Introduction – The purpose of this note is to provide installation instructions and comments on a patch for the CQ/X Client software. The patch applies to version 1.7.9 of the software and is provided to implement the enhancements and fix the problems described below.

Previous Patches – This is the tenth patch for version 1.7.9. Users of version 1.7.8 that have installed all of the patches for that version and Patches 179-01, 179-02 179-03, 179-04, 179-05, 179-06, 179-07, 179-08 and 179-09 can apply this patch without downloading version 1.7.9. Other users should first download and install a full copy of version 1.7.9 from www.no5w.com then apply Patches 179-01, 179-02, 179-03, 179-04, 179-05, 179-06, 179-07, 179-08, 179-09, and 179-10 in that order.

Installation – In addition to these notes the zip file associated with this patch contains a setup file for automatically installing the patch in C:\ProgramFiles\CWSoft\ **WARNING: Please note that the setup file assumes that you have installed the program in C:\Program Files\CWSoft\.** If this is not the case you can still run the setup but following this you will need to manually copy each of the files to their corresponding directories in your location. Here's a list of the files contained in this patch and a description of where they will be installed.

| File | Installation |
|-----------------------------------|---|
| CQXClient.exe CabrilloTags.txt | These are the main executable, and a file containing the Cabrillo tag definitions. They replace files of the same names in the main directory which in the standard installation is C:\Program Files\CWSoft\CQXClient\ |
| TQP.DLL | This is the DLL file that runs all of the state QSO parties. It replaces the file of the same name residing in the ContestDefns subdirectory which in the standard installation is C:\ProgramFiles\CWSoft\CQxClient\ContestDefns\ |
| MISDONQP.def | This is the definition file for the MI-SD-ON multi-QP. It replaces the file of the same name in the MISDON-QSOParty directory which in the standard installation is C:\ProgramFiles\CWSoft\CQxClient\ContestDefns\MISDON-QSOParty\ |

Problems Addressed/Enhancements – The following problems/enhancements are addressed.

| Problem/Enhancement | Description |
|--|----------------------------|
| It would be useful to show the mileage across each county in the Google Map view of the route | This has been implemented. |
| Working the GA-NM-MT there were several crashes either when trying to send the exchange or when logging the QSO. | This has been fixed. |
| Testing of the MI-SD-ON module revealed several problems with QSO entry as implemented in the previous patch. | This has been fixed. |
